

Our Company

Symbiont is one of the first companies to successfully deploy blockchain and smart contract technology in financial services. Asset Managers, Banks, and Governments are using Symbiont’s platform to develop new business lines, increase transparency, reduce risk, and save costs.

Our Platform is Built for Financial Services

Symbiont’s proprietary Smart Security® technology allows complex financial instruments to be automated and fully digitized onto a distributed ledger

 <p>Share Data Share and distribute information among a closed or open group of participants, securely and instantly</p>	 <p>Save Costs Automate the complex and manual back and middle office processes associated with financial services</p>	 <p>Eliminate Tampering Enable an instrument’s life cycle to be fully digitized and cryptographically verifiable</p>
 <p>Reduce Risk Support financial transactions without having to trust and depend on a single counterparty or vendor</p>	 <p>Increase Transparency All live and historical network data are viewable in real time by authorized participants</p>	 <p>Expedite Decisioning Gain immediate feedback for rapid planning and operational assurance</p>

We are Commercializing Vertical-Specific Solutions

INDEX DATA		Market Data Providers & Buy-Side
PRIVATE EQUITY		Registered Agents & Law Firms
GOVERNMENT FINANCIAL SVCS.		Coalition of Investment Banks

Our Hypothesis

Storing financial information from genesis to settlement on a blockchain maximizes the benefits of the technology and will transform financial services
